

 Middle East Port Advisory Date / Time: 18/03/2026 - 17:00 UAE LT						
Regional Overview	The overall operational situation remains broadly unchanged since the last report. ADNOC SPM Terminal in Fujairah has resumed operations, and Mwani Qatar has activated the Exceptional Package of Port Tariff Facilities in response to exceptional circumstances that are disrupting supply chains and creating operational and logistical challenges. Traffic through the Strait of Hormuz remains severely disrupted, with many shipping companies continuing to avoid transits due to heightened security risks. Airspace across most Gulf countries is reopening on a restricted basis. While some countries remain closed, most have resumed limited operations with fewer flights. As a result, crew changes may be possible in certain locations but remain constrained and subject to local conditions. Customers are advised to contact Inchcape for location specific guidance and support.					
	Port Status	ISPS Level	Air Space	Impact to travel	Remarks	Date Logged - UAE LT
UAE	Most ports are operational with some restrictions.	Ruwais PPA ISPS Level 2 All other ports ISPS 1	Open - Limited	Limited airport operations have resumed with a small number of flights.	- Fujairah and Khor Fakkan - The Fujairah Oil Tanker Terminal (FOTT) is operating as per the latest update from the port. Vopak terminals have suspended operations at their SPM until further notice. ADNOC SPM Terminal has resumed operations. (updated) General cargo and container discharge operations are proceeding as scheduled at both Fujairah Terminal and Khor Fakkan Terminal without any disruption. Anchorage services are all normal without interruption. Navigational warning No. 01/2026 has been disseminated, addressing reported incidents of intermittent GPS signal spoofing and jamming in offshore areas of Fujairah. These disruptions may lead to a loss of positional accuracy, erratic vessel movements on Electronic Chart Display and Information Systems (ECDIS), and potentially misleading positional information. Mariners are advised to consider this area as high risk. - Jebel Ali, Hamriya, and Sharjah Port, all terminal port operations are normal. - Ruwais and Abu Dhabi petroleum ports are operational. Ruwais PPA (ISPS level 2) & Abu Dhabi Ports (ISPS Level 1). Abu Dhabi Ports confirmed that all UAE ports managed and operated by AD ports remain fully open and are operating as usual. - Ras Al Khaimah Ports remain open and are operating normally. - Dubai Airports has partially resumed flights to and from Dubai International Airport (DXB) on selected routes, following the temporary suspension introduced as a precautionary measure. Passengers are advised to check directly with their airline for the latest flight information. - Limited airport operations have resumed across the country with a small number of flights operating. Passengers must not travel to the airport unless they have received a confirmed departure time directly from their airline, as schedules remain subject to change. - A temporary measure has been implemented to facilitate customs cargo clearance for shipments destined for Jebel Ali or Abu Dhabi Ports via the Ports of Fujairah and Khor Fakkan. In response to ongoing circumstances, this initiative allows direct road transport of containers to Jebel Ali, designated Free Zones, or Abu Dhabi, eliminating the need to adhere to traditional customs clearance procedures.	18/03/2026 - 16:00

Flights are coming in and out of Israel on a limited basis, with restrictions. - A briefing update from the Israeli Navy was received relating to operations in Israel. Key points: In order to maintain maritime security, a temporary safety zone has been established along the Israeli coast. In coordination with the Israeli Ministry of Transport, the following temporary measures have been introduced to maintain both the safety of the naval operational activity and freedom of navigation: Vessels with a scheduled port call within 24 hours may remain in the designated anchorage area. Vessels scheduled to arrive in more than 24 hours are required to remain 12–18 nautical miles offshore from the coastline, preferably south of the latitude of Mount Carmel. Vessels carrying DG must obtain berthing approval in advance from the Israeli Navy and the Ports and Shipping Authority. AIS systems – it is recommended to switch off the system after entering the Israeli EEZ in order to prevent civil surveillance from online tracking sites. Communication may be established via marine VHF radio / telephone / satellite phone, if required, with the RCC (Rescue Coordination Center) or the naval authorities. Any changes in the maritime security situation will be communicated through subsequent maritime safety notices.	18/03/2026 - 14:00
